

Post Mix Module - Connection

- ① CO₂ In from Regulator (~5,5 Bar)
- ② Water in (Still water from main supply)
- ③ Pre-Chilled water from Cooler to PM Module
- ④ Circulating carbonated water Out - To cooling coil
- ⑤ Circulating carbonated water Out to Python
- ⑥ Circulating carbonated water Return from Python
- ⑦ A T-connection can be spliced in here for Icewater
